PROFILE SUMMARY

Results-driven React Native Developer with 3+ years of experience delivering high-performance mobile applications for Android and iOS platforms. Expert in building scalable mobile architectures, cross-platform UI engineering, and integrating real-time GPS tracking. Proven track record in optimizing mobile application performance, reducing bundle sizes by up to 25%, and leading end-to-end app development from architecture to store deployment.

TECHNICAL SKILLS

Core Mobile & Languages: React Native, JavaScript (ES6+), TypeScript

State & API Integration: Redux Toolkit, React Query, Context API, REST APIs, GraphQL, Firebase

Mobile Native & SDKs: Google Maps API, GPS Location Services, Camera Integration, Razorpay Gateway, Push Notifications

Testing & Tooling: Xcode, Android Studio, Jest, React Native Testing Library, Git, CI/CD

AI & Developer Tools: Cursor AI, ChatGPT, Google Gemini, Claude AI

WORK EXPERIENCE

React Native Developer — Sphinx Solution Pvt. Ltd.

July 2023 – Present | Pune, India

- Engineered high-quality cross-platform mobile apps using React Native, reducing launch bundle size by 25% and improving frame rates to a stable 60 FPS.
- Architected robust state management systems utilizing Redux Toolkit and Context API to manage complex offline data caching.
- Integrated GraphQL endpoints, REST APIs, Firebase services, and Razorpay payment SDKs for seamless transaction handling.
- Implemented background GPS location tracking and dynamic mapping using Google Maps API for real-time app notifications.
- Managed build distribution and deployment pipelines across Android Studio and Xcode environments.

PROJECTS

Sarwa - AI-Powered Delivery & Shopping App

- Built a cross-platform delivery app for ordering groceries, food, and essentials with real-time location tracking.
- Implemented secure checkout workflows with Razorpay and streamlined address detection using Google Maps API.
- Tech Stack:** React Native, Firebase, REST APIs, Razorpay, Google Maps API, Redux Toolkit

No Stress Impress - Dental Care App

- Developed interactive dental guidance mobile application with step-by-step video tutorials and custom camera workflows.
- Integrated client-side image compression, reducing upload payload sizes and improving server processing times by 35%.
- Tech Stack:** React Native, REST APIs, Custom Camera Modules, Image Upload, Firebase

Multiply - Creator Engagement App

- Engineered mobile community platform allowing creators to interact with followers, publish updates, and earn rewards.
- Integrated low-latency GraphQL subscriptions and Firebase to handle thousands of real-time interactions daily.
- Tech Stack:** React Native, GraphQL, Firebase, REST APIs, React Query

Sharehood - Nearby Services App

- Created a hyper-local mobile app enabling users to discover and book nearby service vendors.
- Implemented dynamic map markers, geofencing, and location tracking for smooth vendor navigation.
- Tech Stack:** React Native, Google Maps API, Location Services, Firebase, REST APIs

EDUCATION

PG-Diploma in Mobile Computing | Sunbeam Institute | 2023

B.Tech in Electronics & Communication Engineering | PSIT Kanpur | 2017

Intermediate (12th) | BIC Shahmuhammadpur Candrawar, Ballia | 2013

High School (10th) | Gyan Peethika Jagdishpur, Ballia | 2010

KEY STRENGTHS

Cross-Platform Mobile Development • Native Bridge Optimizations • App Store & Play Store Deployment • Clean Component Architecture • Agile Team Collaboration
